

IT3041 - Lab Sheet 05

1. Create a program for **Index Elimination - Only consider high-idf query terms.**
2. Create a program for **Index Elimination - Only consider docs containing many query terms (Jaccard Coefficient).**
3. Create a program for **Champion Lists.**

For the above tasks use the following documents and the query.

Doc1 - "This is document 1. It contains some text for testing."

Doc2 - "Document 2 has different content for testing purposes."

Doc3 - "The third document is here with unique words."

Query - "This is a test query for information retrieval."
